

Special Issue

Laboratory Diagnosis in Microbial Diseases, 3rd Edition

Message from the Guest Editor

Current diagnosis of infectious diseases largely depends on conventional phenotypic tools. However, typically, phenotypic tools are heavily based on culture and susceptible to bias due to handling during testing. Specifically, the phenotypic result represents the final phenomenon of protein expression in vitro. The details of genomics and proteomics cannot be seen in conventional phenotypic assays. What we can currently see is just the tip of the iceberg of infectious diseases. Thus, I would like to invite outstanding researchers in this field to contribute studies to this Special Issue. Areas of interest include, but are not limited to, genomic or proteomic studies focused on broadening our view on infectious diseases. I believe that these will form a fundamental basis for, and have a considerable impact on, further precise measurements of infectious diseases.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
