Special Issue

Recent Advances in Fertility Diagnosis and Preservation

Message from the Guest Editors

The field of fertility preservation is in constant evolution and the number of indications to preserve fertility continues to increase over time. Clinical and basic science researchers are pushing the limits working on the development of more efficient tools to optimize the diagnosis of fertility alteration and to improve fertility preservation. From a medical perspective, diagnosing ovarian failure and testicular function, optimizing future fertility, reducing the risk of gonadotoxicity and preventing the loss of ovarian reserve are all important objectives of those involved in this field.

We are pleased to invite you to submit your work to this Special Issue that aims at discussing the new advances in the field of the diagnosis of fertility alteration and fertility preservation over the past few years. This Special Issue will focus on different aspects, including clinical protocols as well as laboratory techniques proposed to improve all aspects of fertility preservation for both men and women. This Special Issue will give readers an overview of the novelties in fertility preservation and what is to be expected in the near future.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418).

Diagnostics is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
