

Special Issue

State-of-the-Art Research of Pediatric Imaging

Message from the Guest Editor

This Special Issue of *Diagnostics* will focus on state-of-the-art literature reviews, as well as findings on the most frequent tumors of the thoracic, abdominal and skeletal region seen in children. It is known that some neoplasms are more frequent in the first year of life and others in older children, and this can also help increase confidence in the histology of these tumors. In this Special Issue, works that correlate the various imaging techniques with surgical and histological data will also be particularly appreciated. With regard to imaging techniques, a greater space must be given for the description of methods that do not use ionizing radiation (i.e., ultrasound and magnetic resonance imaging). Computed tomography and nuclear medicine methods must be included in the diagnostic process. Lastly, works that highlight particular aspects of lesions not reported in the literature can also be considered, also in relation to the new histological reading methods related to the radiological data.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
