

Special Issue

Diagnosis and Treatment of Periodontal Diseases in 2022

Message from the Guest Editors

Although significant progress has been made in the field of dental medicine regarding diagnosis and treatment possibilities, periodontal and peri-implant disease still affect a large part of the population worldwide, up to 55% by some reports. Furthermore, this percentage is expected to rise even more in the coming years due to an aging population. In addition to the affected esthetics, function, and quality of life that these pathologies induce, the significant economic burden must also be considered. Taking all this into account, non-invasive, early diagnosis that can discriminate between health and pathology, but also inactive and active periods of disease, is paramount. Moreover, the effectiveness of treatment and monitoring during the maintenance phase is a necessary step in appropriate disease management. The aim of this special issue is to offer an update on the current knowledge of diagnostic methods of periodontal and peri-implant diseases, but also methods of monitoring treatment effectiveness.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
