Advances in Pulmonary and Critical Care Medicine: Diagnosis and Management

Message from the Guest Editor

Pulmonary and critical care medicine stands at the forefront of medical research due to its significant impact on patient outcomes and healthcare systems. The COVID-19 pandemic has further underscored the critical role of this field in addressing respiratory infections, mechanical ventilation, and the management of critically ill patients. Advances in this area not only promise to improve patient care but also aim to reduce the burden on healthcare resources.

This Special Issue aims to explore the latest advances in pulmonary and critical care medicine, focusing on innovative diagnostic techniques and management strategies. With the increasing prevalence of respiratory diseases globally, there is an urgent need for more effective diagnostic tools and therapeutic approaches. The challenges of managing complex pulmonary conditions necessitate multidisciplinary efforts and innovations in medical technology and patient care.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
