

## Special Issue

# Pulmonary Hypertension: Diagnosis and Management

### Message from the Guest Editors

Once neglected, pulmonary hypertension (PH) now attracts increasing numbers of clinicians and researchers. This is due to its high prevalence, nonspecific symptoms and signs, as well as limitations of noninvasive diagnostic methods. Moreover, we all face problems related to the correct assignment of our patients to one of the five PH clinical subgroups, which is crucial for the identification of those in need of specific therapy. Management of PH may include targeted pharmacotherapy, sophisticated percutaneous interventions or surgery, as well as various combination and hybrid approaches. However, despite the progress that we are witnessing, many clinical problems remain and even more are emerging. Scholars who want to help identify and try to resolve these problems, are welcomed to either by reporting their research results, presenting instructive clinical cases, or sharing their experience and knowledge by providing opinion and review articles in the Special Issue. We are ready to post the articles on-line as soon as they are accepted after peer-review, the contributions dealing with PH in the time of COVID-19 pandemics will benefit from a special fast-track.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
