

Special Issue

Contemporary Spine Diagnostics and Management

Message from the Guest Editor

This Special Issue, entitled “Contemporary Spine Diagnostics and Management”, seeks to advance the field of spine care by integrating cutting-edge technologies and approaches that enhance diagnostic accuracy and therapeutic outcomes. We invite the submission of original research, reviews, and translational studies focused on early detection, risk stratification, and personalized treatment strategies for spinal disorders. Key areas of interest include innovative imaging techniques, AI-assisted diagnostics, molecular biomarkers, functional and biomechanical assessment tools, and minimally invasive, image-guided interventions. This Special Issue also emphasizes perioperative risk prediction, outcome modeling, rehabilitation, long-term monitoring, and telemedicine. We especially encourage contributions that explore diagnostic workflows, multidisciplinary care pathways, cost-effectiveness, and implementation strategies bridging research with clinical practice.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
