Current Perspectives and Gaps in the Diagnosis and Management of Rheumatic Diseases

Message from the Guest Editor

The diagnosis and management of rheumatic diseases remain challenging due to the complexity of the immune system, heterogeneity in presentation, diagnostic dilemmas, and gaps in management. More than 100 rheumatic diseases have been identified, encompassing a spectrum from degenerative diseases such as osteoarthritis to prototypical autoimmune inflammatory disorders such as rheumatoid arthritis, systemic lupus erythematosus, vasculitis, spondyloarthritis, and others to auto-inflammatory syndromes. Rheumatic diseases affect up to one-third of the general population [1]. Furthermore, the impact on the quality of life, both in terms of morbidity and in the number of years lost, is tremendous [1]. In this Special Issue entitled "Current Perspectives and Gaps in the Diagnosis and Management of Rheumatic Diseases," we invite investigators to contribute original research or review articles that focus on the current understanding of rheumatic diseases, with a focus on various perspectives and gaps in their diagnosis and management.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
