Cardiac Magnetic Resonance Imaging: Current and Future Clinical Applications

Message from the Guest Editor

Cardiac magnetic resonance imaging (CMRI) is still limited worldwide by cost and scanner availability, but has major advantages in cardiovascular research and has long been the non-invasive standard reference technique for the comprehensive imaging of not only cardiac volumes and flows, but also of myocardial tissue composition. As a “soft tissue technique”, CMRI, even without the use of contrast, provides important information on the myocardium, but especially with the gadolinium contrast technique, CMRI has redefined the evaluation of cardiomyopathies, with important and in some cases life-saving consequences for individual patient treatment. The present Special Issue is focused on current and future clinical applications, and will welcome important findings where CMRI is used to provide important information of value for future patient treatment.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
