State-of-the-Art Research on Endometrial Cancer

Message from the Guest Editors

Endometrial cancer is the most common gynecological neoplasm in countries with a high standard of living, and its incidence is increasing due to way of life (sedentary) and nutrition (high-calorie diet). Surgical therapy is very important, especially in the early stages, and represents the bulk of the cure. Among gynecological tumors it is the one that has had a molecular classification that has led to prognostic correlations. The new guidelines of the European Society of Gynecology have implemented the molecular classification with the already existing ones. Many groups are investing in this new way of seeing endometrial cancer which has become a very heterogeneous disease that suggests a very personalized therapy. In this collection, we want to study endometrial cancers related to obesity, and the correlation between the new classification and the existing one in order to put together new diagnostic models.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
