Novel Diagnostics and Therapeutic Approaches of Retinal Diseases

Message from the Guest Editor

Retinal diseases are the leading causes of vision impairment and blindness. With early detection, most retinal diseases can be treated, while others can be controlled or slowed down to preserve, or even restore vision.

In recent decades, novel diagnostics and therapeutic approaches of retinal diseases have dramatically turned their approach upside down, providing a way for an earlier diagnosis and safer and more effective treatment.

The aim of this Special Issue is to provide an overview of new diagnostics tools and therapeutic approaches in different retinal diseases together to provide the best evidence for proper perioperative and postoperative assessments useful to optimize the response to therapy.

We strive to create a holistic concept throughout the process of diagnosis and treatment based on an individualized and a standardized view, so that treatment of retinal diseases will hopefully not be a challenge in the future.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
