Ultrasound in the Diagnosis and Management of Skin Diseases

Message from the Guest Editors

High-frequency ultrasound (HFUS) is being given increasing attention as a powerful and accessible tool in the field of dermatology, with the potential to enable non-invasive and efficient diagnosis and management of various skin disorders. Skin cancer diagnosis and treatment planning, psoriasis therapy monitoring, and the staging of hidradenitis suppurativa are just a few examples—any skin disease extending into the dermis, internal disease with cutaneous involvement, or even wounds or cosmetic complications may be potential applications of HFUS. This Special Issue is open to receiving publications on any application of ultrasound aiming to diagnose or guide intervention in any medical condition affecting the skin. Publications involving the use of image processing, computer vision, machine learning, artificial intelligence, or the development and testing of novel ultrasound-based imaging techniques, modalities, or diagnostic/therapeutic protocols are especially welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
