Advances in Diagnosis and Treatment of Digestive Disease Using Endoscopic Image and Endoscopic Ultrasound

Message from the Guest Editor

Modern medical technology is mainly based on the concept of minimally invasive medicine, and endoscopy is an important representative of minimally invasive medical technology. At present, digestive endoscopy technology has been comprehensively and maturely developed, and is the main method for the diagnosis and treatment of digestive system diseases. Meanwhile, endoscopic ultrasound, a novel technology combining endoscopy and ultrasound imaging, has shown its advantage in the diagnosis and treatment of digestive disease, including endoscopic ultrasound-guided fine needle aspiration (EUS-FNA) and endoscopic ultrasound-guided fine needle biopsy (EUS-FNB) for diagnosis and EUS-guided biliary drainage (EUS-BD) and EUS-guided gallbladder drainage (EUS-GBD) for treatment. This Special Issue invites the submission of both original and review papers, aiming to collect new findings in the diagnosis and treatment of digestive disease using endoscopic images and endoscopic ultrasound.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
