Obstetric Ultrasound: The Most Patient-Friendly Technique to Detect Fetal Abnormalities and Obstetric Complications

Message from the Guest Editor

Since its introduction in the late 1950s, ultrasound contributes immensely to obstetrical practice and its application is increasingly widespread worldwide, mainly thanks to its noninvasive nature. Starting from the B mode, real-time and gray-scale, Doppler and sophisticated color Doppler versions then arriving at three dimensional/four-dimensional ultrasound and all the other novel methods, such as Fetal HQ Technology, the increasingly optimal resolution of ultrasound results in an improvement in the quality of prenatal diagnosis of fetal abnormalities and other pregnancy complications. Based on this background, this Special Issue aims to present papers focusing on ultrasound prenatal diagnoses of fetal abnormalities, especially those related to twin pregnancies and pregnancy infections such as cytomegalovirus and toxoplasmosis, or the more recent SARS-CoV-2 infection. Other potential topics include ultrasound detection of intra partum and postpartum complications.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
