

## Special Issue

# Machine Learning in Precise and Personalized Diagnosis

### Message from the Guest Editor

It is estimated that, in high-income countries, approximately 5% of patients receive an incorrect medical diagnosis every year. The diagnostic errors are common in patients with serious medical conditions. However, thanks to the recent advancements in Artificial Intelligence and Machine Learning in healthcare systems, a remarkable decline in incorrect diagnosis has been observed. With the availability of a large amount of clinical data, the Machine Learning models show their competency in providing detailed medical diagnosis and prediction without any human expertise. The summary of the latest research reveals that Machine Learning techniques are much more efficient in diagnosing and the early detection of diseases, and medical imaging analysis. Moreover, the Machine Learning-based models are also helpful in precise and personalized diagnoses to the patients. The aim of this Special Issue to publish original research regarding Machine Learning in medical diagnosis and prediction.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
