Diagnosis and Prognosis of Gynecological Diseases: Advances and Challenges

Message from the Guest Editors

Gynecological diseases, including ovarian, cervical, and endometrial cancers, and benign conditions such as endometriosis and fibroids, pose significant challenges to women's health around the world. This Special Issue highlights the latest advancements in the diagnosis and prognosis of these diseases, focusing on innovative technologies such as molecular biomarkers, advanced imaging techniques, and artificial intelligence (AI)-driven tools. These breakthroughs have improved early detection, personalized treatment planning, and prognostic accuracy. However, challenges such as the heterogeneity of diseases, limited access to advanced diagnostics in underserved regions, and the need for non-invasive methods remain critical areas of focus. By promoting cutting-edge research and clinical applications, this Special Issue aims to bridge the gap between scientific innovation and practical healthcare solutions, ultimately improving outcomes for patients with gynecological diseases.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
