

## Special Issue

# Ultrasound Diagnosis and Guided Intervention of Musculoskeletal/Neuromuscular Pathology 2022

### Message from the Guest Editor

The use of clinical symptoms and physical findings for the diagnosis of musculoskeletal disorders is often unreliable. The advancement of ultrasound technology has enabled the delineation of the reciprocal anatomy of the regions, thereby enhancing identification of the underlying pathology. Therefore, this Special Issue will provide a collection of narrative or systematic reviews, basic research and clinical studies which employ ultrasound to identify the origin and associations of musculoskeletal pain as well as to guide interventions.

Since nerve entrapment is a common etiology of musculoskeletal pain, we also welcome articles investigating ultrasound-guided treatment for peripheral nerve entrapment syndrome.

Potential topics include, but are not limited to, the following:

Association of ultrasound diagnosed musculoskeletal painful disorders with pathologies obtained from other imaging modalities;

Accuracy of ultrasound imaging in the diagnosis of musculoskeletal pain compared with surgical and radiological findings;

Use of ultrasound elastography for diagnosis and follow up of musculoskeletal pain.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
