

## Special Issue

# Urinary Tract Infection: Diagnosis, Treatment and Management

### Message from the Guest Editor

Swift and appropriate diagnosis is indispensable for timely treatment and UTI management. This Special Issue in the journal "*Diagnostics*" will focus on articles covering a range of topics including novel diagnostic approaches, the appropriateness of urine specimen collection, utilizing our available diagnostic armamentarium for surveillance, antimicrobial sensitivity/resistance patterns, as well as novel treatment and management approaches. Recently, there has also been a focus on the prevention of UTIs in hospitals and the community. It is, therefore, my pleasure to invite submissions of high quality research-based or review papers related to the aforementioned topics to create a timely and highly relevant collection of articles tackling this pertinent medical problem.
