# Diagnosis and Management of Aneurysm

### Message from the Guest Editors

Arterial aneurysms are devastating diseases that are at high risk of rupture, bleeding, ischemia, and death. Diagnosis is mainly achieved via CTA, MR, and ultrasound imaging. Molecular markers are still unclear. Therapy includes in most cases open surgery or endovascular repair with a large offer of graft prostheses on the market. It is sometimes unclear which patient would profit from open or endovascular procedures. Venous aneurysms are rare, and decision trees in diagnosis and therapy are not clearly established. The progress in our understanding of potential molecular mechanisms needs to be translated into clinical diagnosis and treatment, but there are many unanswered questions and conflicting findings that require clarification before this can happen. This Special Issue of *Diagnostics* aims to highlight new diagnostics and therapies of arterial aneurysms, including aortic aneurysms. Molecular and clinical studies addressing venous aneurysms are also of interest.

# **About the Journal**

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

#### Editor-in-Chief

### Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
