

## Special Issue

# Abdominal Diseases: Diagnosis, Treatment and Management—2nd Edition

### Message from the Guest Editor

*Diagnostics* (ISSN 2075-4418) is an international peer-reviewed open access journal on medical diagnosis, published semimonthly online by MDPI. *Diagnostics* has a Journal Impact Factor of 3.3(2024), and ranks JCR Q1 in the 'Medicine, General and Internal' category. I happily accepted being a for the Special Issue 'Abdominal Diseases: Diagnosis, Treatment and Management—2nd Edition' of this valuable journal, and I invite all of you to offer your scientific contributions in abdominal diseases. Abdominal surgical conditions often raise challenging diagnostic, therapeutic and management issues. The surgeon is often faced with difficult decision-making situations, especially in emergency conditions. Imagistic methods are very useful in diagnostic guidance and are often an important part of image-guided surgery/treatment. Minimally invasive techniques occupy an important aspect, being preferred whenever possible. Laparoscopy is the first choice in most cases. Our defined scope of the topic for this Special Issue is to establish modern management protocols in the diagnosis, treatment and management of abdominal diseases.
