Comorbidities in Heart Failure: Challenges in Clinical Diagnosis and Management

Message from the Guest Editors

Heart failure is a multifaceted cardiovascular disorder affecting millions of people worldwide. One crucial aspect often overlooked is the presence of comorbidities, which significantly impact disease progression, outcomes, and treatment efficacy. Comorbid conditions, such as diabetes, hypertension, chronic kidney disease, and mental health disorders, can complicate heart failure management, challenging clinicians in providing optimal care. Understanding the intricate relationships and mechanisms linking heart failure and comorbidities is essential for developing targeted interventions and improving patient outcomes. This Special Issue aims to explore the complex interplay between heart failure and comorbidities, shedding light on their prevalence, impact, and underlying pathophysiological mechanisms. We invite original research, systematic reviews, and clinical studies that delve into the epidemiology, risk factors, and shared pathways linking heart failure with diverse comorbid conditions. Authors are encouraged to present novel approaches and evidence-based strategies for managing heart failure patients with comorbidities effectively.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
