Diagnostic Markers of Genitourinary Tumors

Message from the Guest Editors

This Special Issue, entitled "Diagnostic Markers of Genitourinary Tumors," aims to explore the latest advancements in the field of diagnostic markers for genitourinary (GU) tumors and their application in routine practice. Genitourinary cancers, including those affecting the bladder, kidneys, prostate, and testes, present significant challenges in both diagnosis and treatment. This SI will focus on novel biomarkers, imaging techniques, molecular assays, and other diagnostic tools that allow early detection, refine prognostication, and tailor personalized treatment strategies for GU tumors, with a particular interest in immunohistochemistry, electron microscopy, in situ hybridization, DNA- and RNA-based techniques, and proteomics. By highlighting cutting-edge research and clinical applications, this Special Issue aims to advance the field of GU oncology, ultimately enhancing patient care and outcomes. In this setting, we look forward to receiving high-quality original articles, reviews, and case reports/case series. Papers dealing with the application of digital imaging systems and artificial intelligence to the field of diagnostics are particularly welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
