

Special Issue

Pathogenesis, Diagnosis, and Management of Rheumatic Disease

Message from the Guest Editor

Rheumatic diseases cover a wide spectrum of conditions with different pathogenesis, diagnoses and treatments. In this Special Issue of *Diagnostics*, we invite colleagues interested in the field. Special attention will be paid to new information on the mechanisms associated with the development of these conditions. Another point of special interest will be the study of comorbidities associated with rheumatic diseases. This Special Issue will prioritize studies on the mechanisms associated with the development of metabolic syndrome and atherosclerosis, which often overshadow the prognosis of rheumatic diseases. Studies on the biomarkers of disease susceptibility and severity and cardiovascular risk in these conditions will be welcome. Finally, since there have been significant advances in the management of rheumatic diseases in recent years, we will include articles that address the use of new therapies, as well as the impact these therapies have on the outcome of these entities. The broad scope of this Special Issue will allow researchers to include a wide variety of studies on these conditions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
