Advances in Diagnosis and Management of Oral Disorders

Message from the Guest Editor

Oral disorders encompass a wide range of conditions that impact the oral cavity, including dental caries, periodontal diseases, oral cancers, and temporomandibular joint disorders. Recent advances in diagnosing and managing these disorders are transforming patient outcomes, enhancing early detection and preventive management, improving treatment efficacy, and promoting individualised care approaches. Existing and new diagnostic techniques, such as enhanced imaging technologies, biomarker-based tests, and artificial intelligence (AI)-driven analysis, have led to the earlier and more accurate prediction or detection of oral diseases. Additionally, innovations in prevention and treatment approaches, including minimally invasive techniques, minimise patient discomfort and recovery time while optimising long-term results. In this Special Issue, we invite original research articles and systematically conducted reviews on advancements in diagnostic techniques and management techniques for oral diseases.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
