

Special Issue

Diagnosis and Prognosis of Hematological Disease

Message from the Guest Editor

This Special Issue offers new insights into the diagnostic process, clinical management, and prognosis of hematological diseases. With advances in precision medicine, significant progress has been made in the diagnosis and management of hematological disorders, including leukemia, lymphoma, and anemia. The integration of molecular diagnostics, such as next-generation sequencing, has enabled more personalized treatment approaches, shifting from traditional chemotherapy to therapies tailored to a patient's genetic profile. This Special Issue aims to highlight the latest developments in hematological diagnosis and prognosis, ranging from basic hematology to advanced technologies such as sequencing and molecular diagnostics. We invite original research articles and reviews in areas including but not limited to molecular diagnostics, predictive biomarkers, and clinical applications in hematology. We look forward to receiving your contributions

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
