# Exploring the Role of Diagnostic Biochemistry

### Message from the Guest Editors

Biochemical testing is used in clinical medicine to obtain biochemical information for the treatment of patients. Information can only be used effectively for clinical decision making if it is true and appropriate, and if the physician recognizes how important it is. Among other kinds of diagnostics, laboratory tests are included in almost 80% of clinical decisions. Therefore, patient safety in laboratory medicine must be thoroughly assured. It needs to be acknowledged as a guarantee against any potential mistakes in the total testing process. Biochemistry is therefore essential in the diagnosis and management of different disorders.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
