

Special Issue

Frontline of Breast Imaging

Message from the Guest Editor

This issue will explore recent developments in breast imaging, including detection and diagnosis of breast cancer, interventional procedures, and monitoring response to breast cancer treatment. The focus will be on practical, multimodality modern breast imaging, including anatomical and functional modalities. This issue aims to provide an update on mammography, breast ultrasound, and breast MRI, as well as other modalities, in an effort to provide information on efficacy and efficiency in breast imaging. Emphasis will be placed on reviewing developments in the last several years, including the time of the COVID-19 pandemic. We look forward to receiving your contributions.
