Dermatology and Venereology: Diagnosis and Management

Message from the Guest Editor

Infections of the skin and mucous membranes, as well as sexually transmitted infections represent a widespread topic for dermatologists, general practitioners and other physicians such as infectious disease specialists, gynecologists, proctologists, otolaryngologists and urologists. Dermatology and venereology also intersect with oncology about tumors of the genital and anal region, that can be linked to infections (such as human papillomaviruses) or inflammatory skin diseases or not. The present Special Issue aims to publish the most recent research and updates in the field of dermatology and venereology. Observational, retrospective and prospective studies that aim to improve and deepen the diagnostic procedures and management of skin and mucosal infections, inflammatory diseases and neoplasms are appropriate for this Special Issue. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: skin infections, sexually transmitted infections, skin and mucosal tumors, exanthems, enanthems and adverse skin reactions to drugs.

Guest Editor

Dr. Giulia Ciccarese

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
