Sarcoidosis: From Diagnosis to Management

Message from the Guest Editor

Sarcoidosis presents a number of challenges for both diagnosis and management. With respect to diagnosis, (1) patients present with non-specific symptoms that can mimic other diseases, (2) there are no definitive tests for diagnosis, so it requires a multidisciplinary approach examining the presentation, imaging, and biopsies, (3) the disease can affect multiple organs, leading to diverse presentations, and (4) it is imperative to rule out other conditions with similar symptoms, including TB and lymphoma. With respect to prognosis, this can vary widely depending on the extent and severity of organ involvement. Despite the challenges, there are still positive developments in the field of sarcoidosis, aiming to improve diagnosis, develop more effective treatments, and understand the cause of the disease. We welcome you to submit your research work related to enhancing the precision of sarcoidosis diagnosis and prognosis and predicting target organ involvement.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
