Diagnosis, Prognosis and Management of Cardiovascular Disease in Patients with Rheumatic Conditions

Message from the Guest Editors

During the past two to three decades, comorbid cardiovascular disease in rheumatoid arthritis has been extensively reported. Rheumatoid arthritis increases the incidence of atherosclerotic cardiovascular diseases including ischemic heart disease and ischemic stroke, heart failure with preserved and reduced ejection fraction and venous thrombotic disease. Cardiovascular comorbidity in rheumatoid arthritis is mediated by not only traditional cardiovascular risk factors but also disease-specific manifestations including particularly different inflammatory pathways. These reported issues complicate the diagnosis, prognosis and management of cardiovascular disease in rheumatoid arthritis. Accordingly, current recommendations on the management of comorbid cardiovascular disease in rheumatoid arthritis are still often based on expert opinion due to a lack of sufficiently reported evidence. We hope that this Special Issue will make a valuable contribution to cardiovascular disease outcomes in patients with rheumatic conditions. We welcome any type of manuscripts including original research studies, narrative and systematic reviews and protocols.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
