Special Issue

Clinical Features, Treatment, and Prognosis of Endocarditis

Message from the Guest Editor

Infective endocarditis is a life-changing infection. Since it was fully described by Dr. William Osler over a century now, and in spite of advances in antimicrobial therapy and cardiac surgery, the disease continues to be a devastating medical condition. Hospital mortality still exceeds 20% in many tertiary care centers, and delayed morbidity and mortality continue to exist, in spite of soaring cost of medical care. The numbers of patients with endocarditis on medicine and cardiology wards continues to increase. The procedures for diagnosis of endocarditis have also seen many breakthroughs in molecular identification, antibiotic resistance patterns, and imaging techniques. The scope of this volume is to shed light on the current difficulties in the timely diagnosis of infective endocarditis and its complications, and how making the best use of clinical skills, laboratory testing and imaging techniques can achieve a timely, accurate, and complete diagnosis of infective endocarditis Hussien H. Rizk, MD

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
