

## Special Issue

# Alzheimer's Disease Imaging Biomarkers

### Message from the Guest Editor

Alzheimer's disease (AD)—a progressive, neurodegenerative, and incurable disorder—is the most common form of dementia diagnosed in people over the age of 65. AD research is progressing steadily, but one aspect continues to elude the basic and clinical sciences: Despite our knowledge of AD pathophysiology and anatomic pathology, in addition to breakthroughs in MRI and PET imaging, a reliable and accurate diagnostic imaging protocol that discriminates AD from other neurodegenerative diseases does not exist. Indeed, neuropathologic examination of postmortem tissue remains the gold standard of AD diagnosis.

The primary goals of this Special Issue on “Alzheimer's Disease Imaging Biomarkers” are to recount the history of AD imaging breakthroughs, present ongoing cutting edge research, and introduce novel ideas that will advance the field. The Special Issue will include invited and solicited submissions. We welcome your contribution. With warmest regards, Prof. Dr. Jonathan J. Wisco

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
