

## Special Issue

# Animal Models in Human Diagnostics

### Message from the Guest Editor

There have been remarkable updates during the last decade in animal disease model development. The majority of studies in this field have since the very beginning been carried out using rodent animals. The reason for this is that rodent animals provide easy access, and numerous data can be extrapolated which can be of use to researchers. Recently, however, the limitations of rodent disease modality have led to a push to expand research beyond rodent animals, even though they still represent the strongest candidate for evaluating human disease. This Special Issue invites articles on human disease animal models based on animals of a medium and/or large size, such as dogs or swine. The goal is to showcase the recent focus of research and to provide future directions in terms of animal disease models.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer  
Department of Clinical Physiology, Nuclear Medicine & PET National  
University Hospital, Rigshospitalet, University of Copenhagen,  
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
