Coronary Artery Disease Imaging

Message from the Guest Editor

Coronary artery disease is the most common life-threatening cardiac pathology, and constitutes a significant financial burden on the global economy. Coronary disease has traditionally been diagnosed and managed using electrocardiography, which indirectly reflects myocardial ischemia, rather than the actual arterial disease. Recent technological developments have enabled the direct visualization of the coronary arteries and hence the ability to ascertain the presence, nature, and extent of the disease. Multi-detector CT allows direct imaging of the coronary arterial lumen and wall, hence the easy detection of early disease before complete lumen obstruction develops. This Issue is dedicated to coronary artery imaging in the context of atherosclerosis, and aims to publish a series of novel findings and comprehensive review articles.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
