

## Special Issue

# Early Dementia Screening and Treatment 2016

### Message from the Guest Editor

Dementia is a growing problem worldwide due to an ageing population. The majority of dementia cases are expected to reside in developing countries with few resources such as medically trained staff and instruments. Easy to apply, cheap, and valid screening tests for a cross-cultural assessment are thus needed. Several reviews have suggested that early treatment may be most successful. This Special Issue includes several papers by experts discussing best diagnostic tests for early dementia including neuropsychological and biomarker tests and treatments, which have been shown to be successful for early dementia.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
