Echocardiography

Message from the Guest Editor

Echocardiography has long been known as an extremely versatile and precise technique for the investigation of the circulation in health and disease. For years, echocardiography has been the mainstay of important randomized studies in heart failure, and aside from ECG, chest X-ray, and the biomarkers of heart failure and myocardial necrosis, echocardiography is the first technique to turn to in most patient encounters in cardiology. Future randomized studies in heart failure will probably rely more heavily on biomarkers and other noninvasive techniques. Thus, echo-Doppler will for years be vital when dealing with the critically ill, since echo-Doppler and tissue-Doppler provide important information about the heart's interaction with its surroundings: the pulmonary and peripheral circulation. We invite contributions that build on the important physiological parameters that can be determined with echocardiography, opening the way for studies that apply echo-Doppler in other patient groups. Further, we invite studies focused on how to leverage information on cardiac pressure that is obtained noninvasively.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National
University Hospital, Rigshospitalet, University of Copenhagen,
Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
