

## Special Issue

# Translational Research on Muscle and Mobility Medicine

### Message from the Guest Editors

Diagnostics and managements of genetic and acquired skeletal muscle disorders are usually treated separately by specialists who seldom interact. It is the ambitious plan of the *Diagnostics* Special Issue: "**Translational Research on Muscle and Mobility Medicine (TRM3)**" to attract the best potential contributions from disciplines spanning a wide array of topics, from human genetic and acquired myopathies to veterinary mobility disorders.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
