# The Diagnostic Value of Nerve and Muscle Ultrasound in Neuromuscular Disorders

### Message from the Guest Editor

High-resolution ultrasound of the nerves and muscles is an upcoming tool in neuromuscular centers. Through the use of HRUS, one can detect nerve inflammation, fibrosis or scar tissue. In many cases, HRUS reveals nerve or fascicle area enlargement, decrease or increase of echointensity or nerve compression. Therapeutic response, change of nerve morphology during healing processes or further nerve increase correlating with pathology have been proven by our study groups in smaller studies; however, many aspects remain unclear, and further prospective, multicentric studies are necessary. Even in healthy persons, knowledge about nerve size, fascicular somatotopy, and nerve elasticity is limited, and thus, further analyses are needed. Similarly, muscle ultrasound can detect atrophy, neurogene or myogene damage and spontaneous activities

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.3 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
