

Special Issue

Pediatric Liver Diseases

Message from the Guest Editors

Pediatric hepatology has expanded in the last couple of decades as the amount of information of genetics, developmental biology, and metabolic studies has increased exponentially. This new Special Issue focusing on pediatric liver diseases has the intent to conglomerate research and review articles on several fields of the developing and damaged liver. The influence of the environment on liver diseases has grabbed our attention because of climate change but also because of the number of toxins that a child may be exposed to in developed and underdeveloped countries. The perspective of new clinical trials for autoimmune hepatitis and infectious liver diseases will be also part of this Special Issue. A section will also be reserved for imaging diagnostics. Digital images through a multitude of social media platforms and the introduction of new algorithms in artificial intelligence will help to efficiently and effectively implement new platforms of electronic medical records and approaches to personalized medicine.

Guest Editors

Prof. Dr. Susan M. Gilmour

University of Alberta, Edmonton, AB, Canada

Prof. Dr. Consolato M. Sergi

Department of Laboratory Medicine and Pathology, Division of Anatomical Pathology, Children's Hospital of Eastern Ontario, University of Ottawa, Ottawa, ON K1H 8L1, Canada

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
