Special Issue

Classification, Clinicopathological Features, and Prognosis of Thymomas

Message from the Guest Editors

We are proposing a Special Issue entitled "Classification, Clinicopathological Features, and Prognosis of Thymomas". Thymic epithelial tumors are considered rare tumors, but knowledge and innovation regarding their biology, diagnosis, and treatment have evolved rapidly, especially in recent decades, with improvements in diagnostic tools and the spectrum of therapies. Moreover, it is now generally accepted that for these tumors, a multidisciplinary approach is mandatory, involving pathologists, (nuclear medicine) radiologists, neurologists, surgeons, and oncologists, and the integration of these figures for thymomas management may lead to a better comprehension of this disease, with important improvements on survival outcome. For these reasons, we are proposing a Specific Issue that includes a holistic approach to these tumors, from diagnosis to treatment, with the aim to give complete indications for actual thymoma management, but also looking at perspectives for treatment and long terms outcomes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
