Deadline for manuscript
submissions:

closed (29 February 2024)

Message from the Guest Editor

Chronic inflammation exerts a significant impact on health and quality of life across various diseases. Over the years, nutritional therapies, including supplementation interventions, have been extensively explored to assess the effectiveness and safety of dietary supplements, considering diverse molecular pathways and mechanisms of action. Given the link between chronic low-grade inflammation and numerous nutrition and metabolism-related disorders, investigating the role of dietary supplements in managing inflammation can provide valuable insights into molecular mechanisms.

This special issue explores the domain of dietary supplementation for addressing human inflammation, with the goal of illuminating the current evidentiary landscape and summarizing recent advances in the field of nutritional therapy. The outcomes of this scientific endeavor are poised to set a path toward the prevention and treatment of a range of nutrition-related disorders, contributing to the larger framework of precision nutrition.

Message from the Editor-in-Chief

Dietetics (ISSN 2674-0311) is an international, peer-reviewed, open access journal of human dietetics. It publishes reviews, regular research papers, and communications. Our aim is to publish timely experimental and theoretical research results in a rapid and readily accessible manner.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.3 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2023).

Recognition of Reviewers: APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
