

Special Issue

Bridging Digital Approaches and Legacy in Archaeology

Message from the Guest Editors

Contributions are invited on topics including but not restricted to the following:

- Tackling data absence and uncertainty in traditional research archives
- Computational approaches to harvesting analogue or digitized data
- The prospect and limits in AI legacy data processing
- From analogue to digital data: establishing provenance
- Remote sensing legacies and new opportunities
- Retrospective photogrammetry
- 3D spatial data augmentation
- Data re-use in video gaming
- Obsolete machinery and discontinued peripherals; equipment as material culture.
- Political legacies in and of digital technology
- Economics of legacies—(long term) costs of maintaining digital legacies and sustainability
- Missed/disrupted digital legacies in the form of workflows, technologies, data, personal experiences, and know-how
