

Special Issue

Intelligent Digital Health Interventions

Message from the Guest Editors

Dear Colleague, The Special Issue on Intelligent Digital Health Interventions aims to present the latest advances in the application of digital health technologies. Theoretical and practical aspects related to digital health, reviews, as well as interventions targeting the COVID-19 pandemic period are appropriate. Topics of interest include, but are not limited to: Mobile and pervasive computing;

- Machine learning approaches;
- Real-world digital health interventions;
- Decision support systems;
- Knowledge discovery in intelligent health systems;
- Natural language processing;
- Mining of electronic health records;
- Security of health information;
- Medical devices, smart biosensors, and sensor networks;
- Internet of Things;
- Augmented or virtual reality applications;
- Usability and patient satisfaction;
- Health education;
- Robotics interventions;
- Digital health technologies designed specifically for children, seniors, or people with chronic disease.
