Special Issue

White-Box Artificial Intelligence

Message from the Guest Editors

This SI focuses on both theoretical and practical aspects of White-box Artificial Intelligence and Machine Learning. Particularly, we are looking for approaches that can facilitate algorithm development to make it less time consuming for developers and enchance the transparency. Topics of interest include, but are not limited to:

- Enchancing usability between AI or ML systems and humans;
- Explainability of AI or ML algorithms;
- Transparent AI or ML algorithms;
- Evaluation metrics;
- Visualization techniques;
- User interfaces that facilitate algorithm development (GUIs, NLP, Chatbots);
- Automated code generation;
- Novel applications of Human-Centred AI or ML;
- Trust, Privacy and Security Issues;
- Experiences with the development of industrial ML systems;
- Evaluation of programming languages and libraries when developing ML systems.

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, Ei Compendex, EBSCO, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.9 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
