About the Journal

Message from the Editor-in-Chief

Disability is a multidimensional construct and is the product of complex and situational interactions between an individual's attributes and their environments. This broadens the perspective of disability and allows for the examination of individual, social, and environmental influences on functioning, disability, and ability occurring in historical and cultural settings.

Consequently, *Disabilities* is inclusive of all types of disability, across all ages and contexts. We particularly welcome articles from low- and middle- income countries and articles that are authored/co-authored by people with the lived experience of disabilities.
