

Special Issue

Transportation and Disabilities: Challenges and Opportunities

Message from the Guest Editors

People with disabilities continually face significant barriers to transportation. These barriers are not limited to physical accessibility, but also include sensory, cognitive, and communication-related obstacles. Traditional transportation services commonly fail to accommodate the diverse needs of people with disabilities, which can have a negative impact on autonomy, employment opportunities, and overall quality of life. This Special Issue explores innovative transportation solutions that promote accessibility and inclusion. From adapted transport services to autonomous vehicles, digital navigation aids, and training programs for using regular transit systems, numerous emerging approaches have the potential to transform community mobility for persons with disabilities. We invite researchers to contribute original studies that address transportation challenges faced by people with any kind of disabilities, development of solutions that can facilitate mobility, or assessment of those solutions. We welcome submissions from diverse fields, including transportation studies, urban planning, rehabilitation sciences, disability studies, engineering, and policy research.

About the Journal

Message from the Editor-in-Chief

Disability is a multidimensional construct and is the product of complex and situational interactions between an individual's attributes and their environments. This broadens the perspective of disability and allows for the examination of individual, social, and environmental influences on functioning, disability, and ability occurring in historical and cultural settings.

Consequently, *Disabilities* is inclusive of all types of disability, across all ages and contexts. We particularly welcome articles from low- and middle- income countries and articles that are authored/co-authored by people with the lived experience of disabilities.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 50.2 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the first half of 2025).
