

## Special Issue

# Health and Wellbeing of Individuals with Disability

### Message from the Guest Editors

Disability affects millions of people globally, as well as their families and society. Some individuals are born with disabilities from birth, perhaps due to a congenital medical condition or an event that happened during delivery. Others acquire disability at a later stage of life, for instance through a traumatic accident during midlife. Others still age into disability in the later years of life. Disability is multifaceted, and how it is experienced, perceived, and discussed differs across geographical and academic cultures and traditions. In the last few decades, disability-related research has been largely shaped by the International Classification of Functioning, Disability, and Health (ICF) framework, where it is recognized that activities, participation, the environment, and personal factors, in addition to body function and structures, interact to shape a person's life. In this inaugural Issue of Disability, we encourage submissions related to quality of life (QoL), wellbeing, and health in individuals with disabilities across the lifespan from a person-centered multidisciplinary perspective.

### Guest Editors

Dr. Ann Alriksson-Schmidt

Department of Clinical Sciences Lund, Skåne University Hospital, Orthopedics, Lund University, 221 00 Lund, Sweden

Dr. Ira Jeglinsky-Kankainen

Arcada, University of Applied Sciences, 00560 Helsinki, Finland

### Deadline for manuscript submissions

closed (28 February 2022)

## About the Journal

### Message from the Editor-in-Chief

Disability is a multidimensional construct and is the product of complex and situational interactions between an individual's attributes and their environments. This broadens the perspective of disability and allows for the examination of individual, social, and environmental influences on functioning, disability, and ability occurring in historical and cultural settings.

Consequently, *Disabilities* is inclusive of all types of disability, across all ages and contexts. We particularly welcome articles from low- and middle- income countries and articles that are authored/co-authored by people with the lived experience of disabilities.

---

### Editor-in-Chief

Prof. Dr. Reinie Cordier

Curtin School of Allied Health, Faculty of Health Sciences, Curtin University, Perth, WA 6102, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 50.2 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the first half of 2025).
