

Special Issue

Supporting Family Carers of Persons with Disability in Low- and Middle-Income Countries: Progress and Pitfalls

Message from the Guest Editors

This Special Issue aims to compile studies into family caregiving in low-resource countries around the world. Particular attention will be given to papers that describe innovative supports provided to family carers and evidence of their impact on carers, families and their relatives with disabilities. Submissions are welcome for all impairment conditions, different personnel who provide family caregiving beyond mothers and rural and urban settings. Systematic reviews of past research on family carers in LMI countries, as well as papers that analyse policy implementation and conceptual frameworks to guide family-based interventions, will also be considered. The aim of this Special Issue is to provide examples of good practice that are viable for adoption in LMI countries while cautioning about pitfalls that are likely to be encountered.

About the Journal

Message from the Editor-in-Chief

Disability is a multidimensional construct and is the product of complex and situational interactions between an individual's attributes and their environments. This broadens the perspective of disability and allows for the examination of individual, social, and environmental influences on functioning, disability, and ability occurring in historical and cultural settings.

Consequently, *Disabilities* is inclusive of all types of disability, across all ages and contexts. We particularly welcome articles from low- and middle- income countries and articles that are authored/co-authored by people with the lived experience of disabilities.

Editor-in-Chief

Prof. Dr. Reinie Cordier

Curtin School of Allied Health, Faculty of Health Sciences, Curtin University, Perth, WA 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 50.2 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the first half of 2025).
