Advances in Disability-Inclusive Disaster Risk Reduction

Message from the Guest Editors

People with disabilities are disproportionately impacted by disaster events, but they have been overlooked in research, practice, and policy development on disaster risk reduction. People with disabilities have fewer choices and opportunities to access and use risk information and preparedness resources that have been designed without consideration of their access and support needs and risk situation. The lack of inclusion before a disaster has a knock-on effect, with negative impacts on people with disabilities when it comes to emergency warnings, response efforts, and access to support during evacuation and disaster recovery. This Special Issue aims to share initiatives that will help us to progress Disability-Inclusive Disaster Risk Reduction (DIDRR) principles into action-oriented development and change. The research question behind this Special Issue queries: How are we keeping people with disabilities and their support needs at the centre of disaster risk reduction—before, during, and after disasters? We invite submissions that describe the efforts of multiple stakeholders working in partnership with people with disabilities and their representatives.

About the Journal

Message from the Editor-in-Chief

Disability is a multidimensional construct and is the product of complex and situational interactions between an individual's attributes and their environments. This broadens the perspective of disability and allows for the examination of individual, social, and environmental influences on functioning, disability, and ability occurring in historical and cultural settings.

Consequently, *Disabilities* is inclusive of all types of disability, across all ages and contexts. We particularly welcome articles from low- and middle- income countries and articles that are authored/co-authored by people with the lived experience of disabilities.

Editor-in-Chief

Prof. Dr. Reinie Cordier

Curtin School of Allied Health, Faculty of Health Sciences, Curtin University, Perth, WA 6102, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 50.2 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the first half of 2025).
