submissions:

**closed (30 November 2023)**

### Message from the Guest Editor

The increasing prevalence of overweight and obesity is a major global public health issue. Physical activity and exercise, as well as positive eating habits, promote beneficial physiological and psychological responses in overweight and obese individuals. Thus, studies must be undertaken that explore the effectiveness of physical activity or structured exercise, alone or combined with nutritional interventions, on body composition, physical fitness, cardiometabolic health and mental health in overweight and obese individuals of all ages. The current Special Issue aims to highlight evidence for use in practice and to provide valuable information that might improve an array of psychophysiological parameters. In this Special Issue, we welcome original research, case reports, reviews, systematic reviews and meta-analyses on physical activity, exercise and/or nutrition and:

- Anthropometric characteristics;
- Body composition;
- Glucose metabolism;
- Lipid metabolism;
- Blood pressure;
- Physical fitness and Exercise behavioral regulation;
- Enjoyment;
- Affective valence;
- Quality of life;
- Mood state;
- Depression, Anxiety and stress;
- Eating habits.

## Message from the Editor-in-Chief

*Diseases* is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

*Diseases* is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental)
